Noise in open-plan office *is the NO.1 distraction to employee*

Over 2/3 of employees say that noise in the open plan environment affects satisfaction and productivity

50% employees report that there is no protection of collaboration privacy

Small-scale conference calls occupy limited meeting room resource

It takes 20 min for the people engaging in creative work to regain focus after a small distraction

Acoustic proofing supports transition between collaboration and personal focus

Tongji University reported that STI (Speech Transmission Index) is a physical quantity with respect to speech intelligibility. A quiet environment is of crucial importance for good speech intelligibility. **Noise, such as irrelevant speech, is best reduced by distancing oneself from the sound source or by using a "sound absorber".**

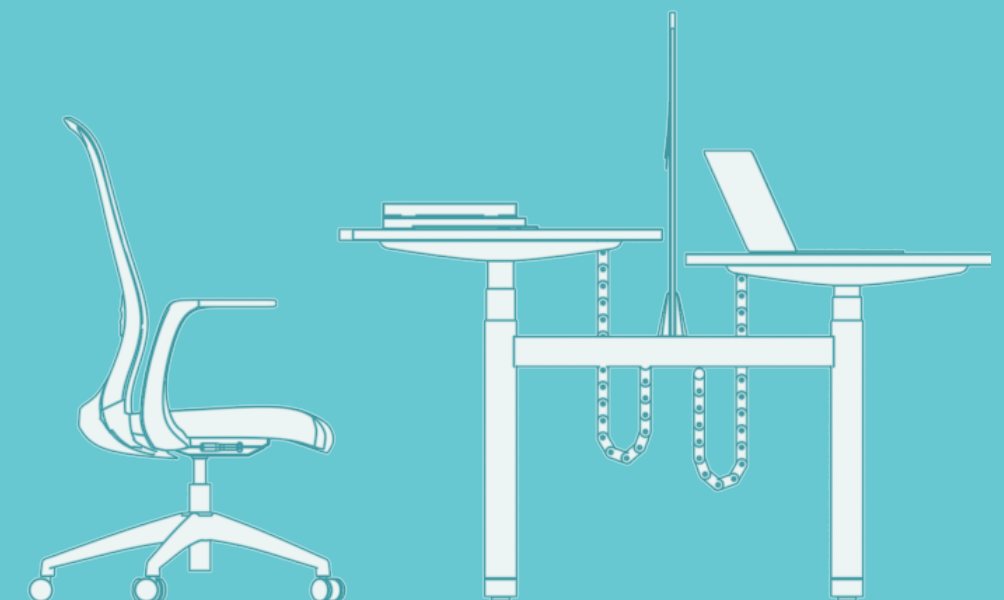

Create the best acoustic environment

UP TO
1M

to Unintelligible Information

As we all know, when people gather together, there is noise certainly. However, the truth influencing employee's attention and work performance is the contents in speech as they are closed to each other, based on our research with Tongji University.

collaboration and meeting

Dedicated space for you

Provide you with dedicated space for working, private calls, video conferencing and relaxation. It not only helps enhance innovation ability and working efficiency, but also improves physical and mental health and comfort.

Vital and comfortable working

In a public place, Nobius single booth creates private space where you can make private call and vide conference. Solitary environment with perfect soundproof performance offers all people a quiet and relaxing experience once they enter in Nobius. No one feels the deathly stillness or has the sense of claustrophobia in Nobius even if they stay in Nobius for a long time, because the internal acoustics effect and room temperature makes people feel pleasant.

Acoustic activity in 8h Office work

Nobius advocates healthy and positive working state. The lifting table configuration allows you to work sitting or standing as you like and stay active. Nobius creates a more ergonomic workspace, keeping you work comfortably and vigorously.

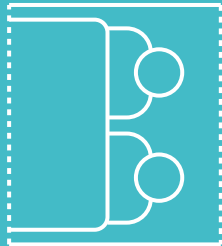

Automatic lifting controller, desktop
lifting height range 750-1050mm,
rebound when encountering resistance

Bevelled desktop near the door for
easy access

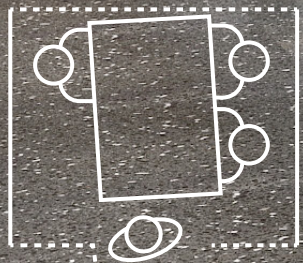

Nest

A space for one or two people
to negotiate and take a nap

Provide a place for short talk, relaxation and video conferencing. It can be used as long-term office space for one person, and also a temporary private space for conversation between two people.

Node

Relaxation and collaborative space for four people

Provide a place for business meetings, team decision-making and brain storming. Internal desktop can be moved left and right to facilitate access.

Acoustic activity

Optional writing tablet can be configured on the outer side of Nobius for writing. It's magnetic absorbable. By combining it with Rocky Horse Chair, a flexible collaborative area for discussion and writing can be set up.

Six-person space for sparking inspiration and creativity

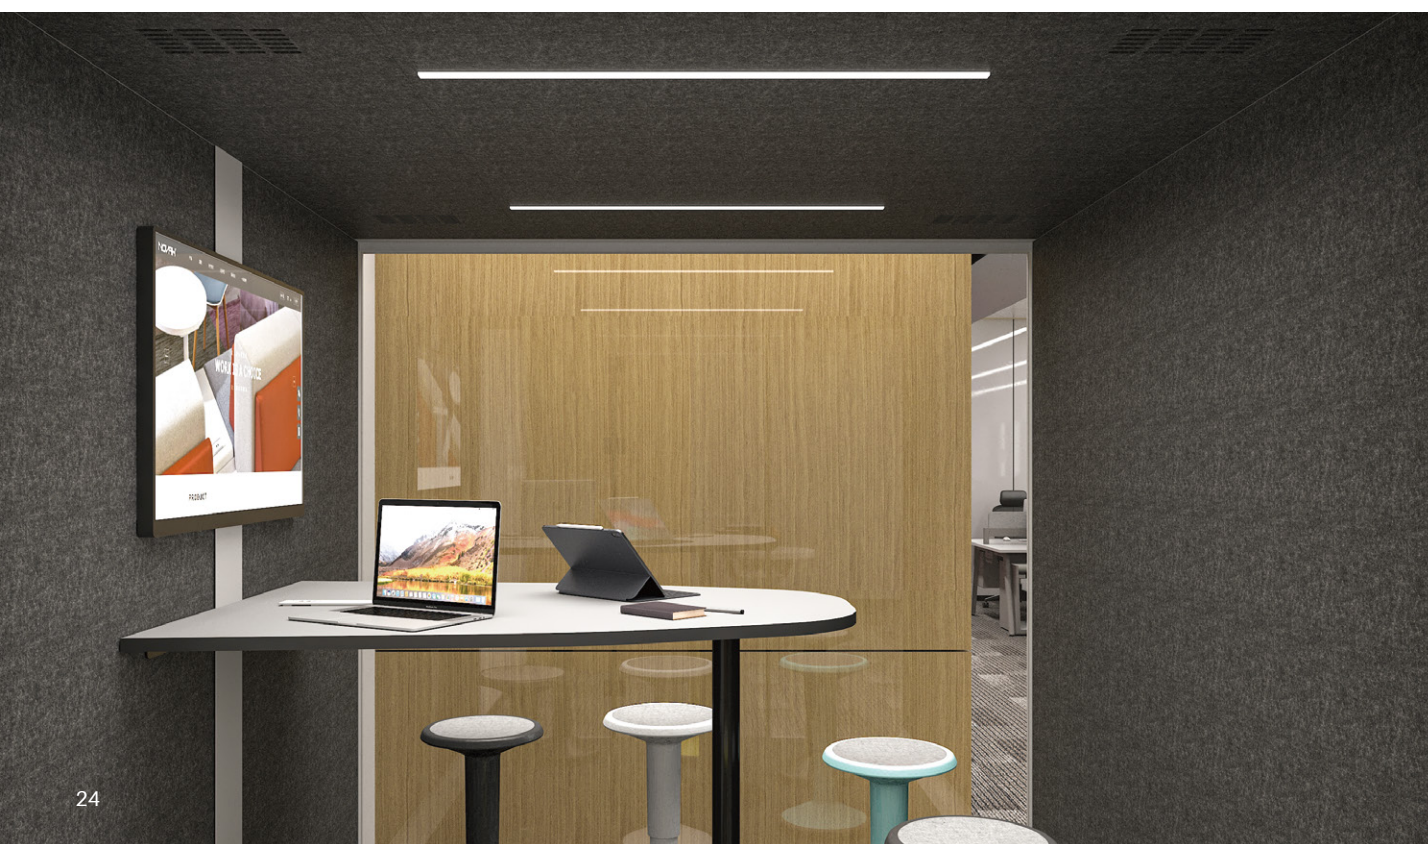

Provide meeting and brainstorming space for small project teams, where the teamwork of the project team can be stimulated.

Upholstery configuration is available for the side steel plate of the Nobius booth. Multiple color options are offered. You can freely select the color depending on the company's environmental color and the themed color, making office space more warm.

Nobius six-person standing desktop is island-shaped desktop, which is wide at the front and narrow at the back (the side near the TV is wider and the outer side becomes narrow gradually). In this way, people's views won't be blocked by each other during meeting.

Acoustic activity in 8h Office work

Open collaborative area

Convenient for movement. The number of pulleys is increased to 12 at the bottom of six-person desk, creating larger space without affecting the mobility convenience. The spatial layout can be easily adjusted on the same floor, facilitating regional planning and management.
