Workstation

NOVAH®

Corridor scenario

Morph Locker is a highly flexible locker system that can be configured and customized to satisfy the demands of organizations and individuals. With unique structure and system, it can act as a space divider and transfer station and flexibly adapt to the scene in different office areas with diversified combinations.

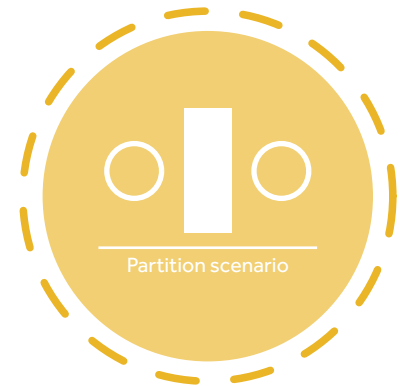

Workstation scenario

The role of storage evolves as we achieve transition from working environment made up of fixed workstation to a more flexible, shared work environment. Now, in addition to some office supplies, we also have helmets we wear on the way to the office and high-heeled shoes for after-work banquets. Due to the balance between work and life, the transition between them becomes increasingly blurred. From one end to the other, the transition between them is interwoven; from one space to another, diversified and flexible configurations are provided for multiple scenarios, integrating the storage modules of whole office environment into one. That's why Morph Locker is designed. It's the tie that binds different office behaviors and different areas and storeys in the workplace, and integrates the whole office space as unified ecosystem.

Bar counter scenario

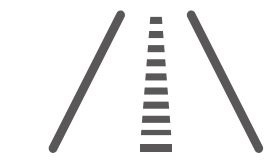

As the nature of work changes from working alone to co-working, a kind of new office environment is emerging. Under this environment, people often spend the time with others in shared spaces. Storage needs to evolve with the development of offices.

Partition scenario

The role of storage system is no longer limited to storage. Whether the locker is used by individual worker or placed in shared space, new locker series can offer the functions of personal storage, privacy and space division. It facilitates collaboration by displaying information and keeps team members connected by creating shared spaces. Locker is a versatile tool that can be applied throughout the office ecosystem.

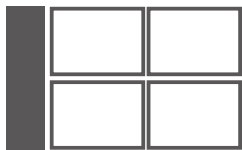

Corridor scenario

Morph Locker allows mobile workers to enter the space quickly and store their personal belongings at ease.

Lightweight and exquisite flip-type slot facilitate the transfer of documents between colleagues, saving communication costs and improving working efficiency.

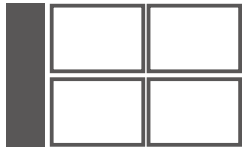

Workstation scenario

Located near the workstation, Morph Locker perfectly satisfies employees' storage demand; office satisfaction is enhanced by setting additional decorations (e.g. greenery) and introducing outdoor elements.

Magnetic business card holder can be used to identify locker ID and display employee information, and placed in a digital style to form number identification of locker door. Not only does it make it easy for employees to find their locker, but it also adds a little zest and vitality to serious office.

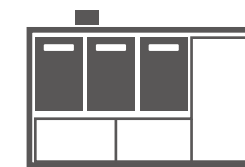

Workstation scenario

Morph Smart Locker enables us to say goodbye to keys and locks. It supports online reservation and realizes one-click authorization, fast allocation and easy management. Morph Smart Locker liberates the storage space under the office table while guaranteeing employees' concentration on work.

Thanks to its integrated design, the locker can be placed in the corridor and a narrow and small space. One-click storage by scanning QR code, one-click startup and independent spaces offer guarantee for privacy and non-contact operation.

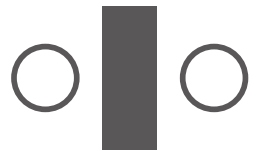

Bar counter scenario

Morph Locker efficiently makes full use of the fragmented space in the office. For example, installing Morph Locker under the standing-type collaborative bar counter is a great option and the standing locker facilitates the communication and impromptu discussions between team members.

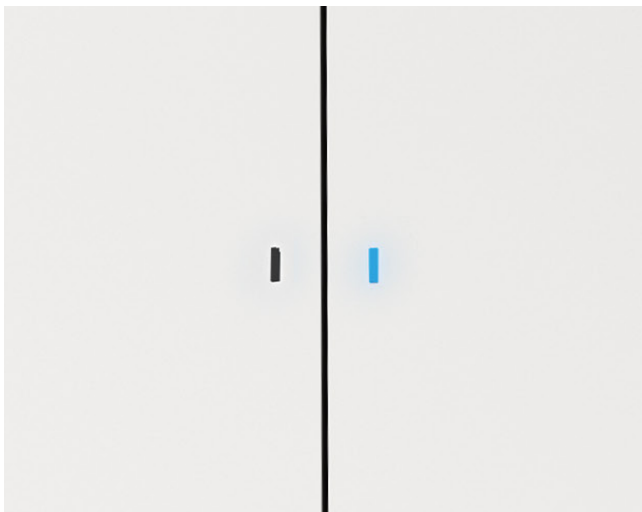

Through the flexible combination of different sizes and specifications of lockers, they can satisfy the storage demands of all articles from small personal belongings to large public goods of team.

Partition scenario

Shared area. Morph Smart Locker provides value-added services like scanning QR code to allocate lockers and backend management, saving space, creating convenience for users and improving management.

Temporary office workers or visitors who carry luggage can select a free compartment with the visitor code for storage, or store their belongings temporarily by virtue of internal employee's QR code, but the locker can be only used on the day. For a long term of use, fixed locker can be allocated through the backend system.

The most intelligent indicator light indicates the usage status intuitively, improving the service efficiency.

Multi-mode Smart Application

01 Dedicated storage for employees

Independent and exclusive space for storage of personal belongings. It's easy for use and improves the utilization ratio of office storage space.

02 Convenient storage for visitors

A visitor or team who needs to work on site or is on a business trip temporarily can scan the visitor code to store articles with one-click.

03 Employee and visitor shared storage

One-key scanning QR code, intelligent startup, free choice.
