

FRASSO

Seating

NOVAH®

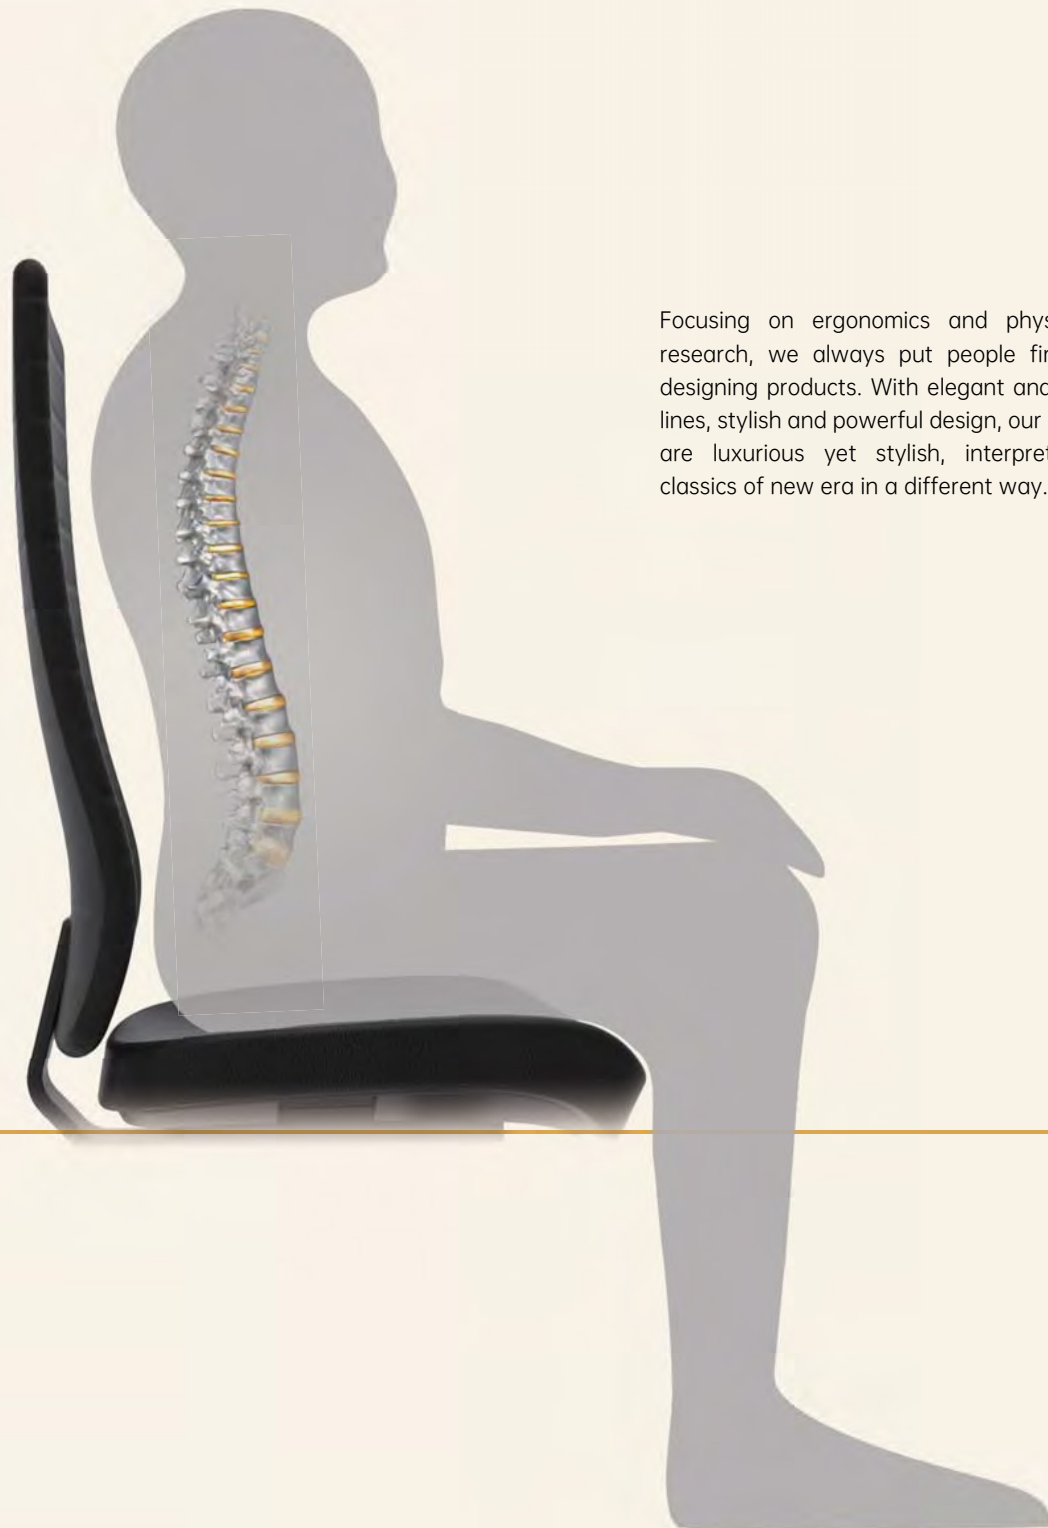

Enjoy your life! Enjoy every detail, every touching moment and every day in your life; feel such changing, wonderful and challenging life with your heart, and you will discover the eternal beauty of life at the moment of insight.

FRASSOTM

Ergonomics Application

Focusing on ergonomics and physiological research, we always put people first while designing products. With elegant and smooth lines, stylish and powerful design, our products are luxurious yet stylish, interpreting the classics of new era in a different way.

In the design of FRASSO series, the emphasis is placed on "softness", aiming to bring users more "soft and comfortable" seating feeling.

FRASSO chair is simple yet elegant. It's a perfect combination of motion and quietness that is reflected in the natural waist line design of chair back and multi-functional tilting & locking base.

Creative inspiration

The beauty of nature and silence and wonderful personality of cobblestones brings us the experience of close to nature and nurturing our temperament.

FRASSOTM

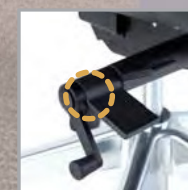

The intelligent and stealth headrest is concise and user-friendly.

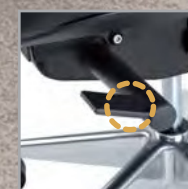

The ergonomic curve of chair back makes people feel relaxed & comfortable.

Smooth shape and body of the chair blend seamlessly.

The tilting tension of chair back, seat height and seat depth are adjustable.

Five-stage locking function, five tilting options.

Both sides of the seat cushion are slightly higher while the front end uplifts slightly and then slides downward naturally, proving more comfortable seating feeling.

FRASSOTM

In terms of the medium back chair, it has clean and sharp lines, strong yet pliant. The perfect match of all parts of the chair enhance its stability and comfortability.

Armrest lifting: Press down the button to adjust the armrest to the comfortable position

Tilting tension: Rotate the handle clockwise to increase the resistance, rotate the handle anticlockwise to reduce the resistance.

Chair locking: Pull out the handle on the lower left side of the seat cushion to unlock the back; lean back to a comfortable angle and then push the handle inward. The chair back can be locked at five different angles.
Chair height adjustment: Rotate the handle clockwise, rise from the seat slightly or sit down to push the seat to appropriate height, and then release the handle.

FRASSOTM

The very metallic electroplated frame of arched chair and the elbow pipes hidden under the seat enhance the strength of the chair. Streamline foot pad gives special charm to the products, making them more perfect in every detail.

FRASSOTM

The Workstation

AB InBev (Shanghai) Project Site Picture

FRASSO series chair with NOVAH CLUSTER workstation is a perfect consolidation, which creates a simple dynamic office space.

FRASSOTM

The color and materials of FRASSO series can be customized as required. Diversified product options make it more suitable for all kinds of office spaces.
