DESIGN

Ocee & Four Design is a long-established Danish furniture company that began in the 1930s. As an innovator in the furniture industry, Four Design is not only dedicated to manufacturing and selling furniture but also serves as a leader in transforming industry experiences.

Four Design's unique design philosophy aims to find the perfect balance between functionality, design, and the "Aha" moment. It transforms good spaces into great experiences, creating environments that encourage participation, help maintain relationships, and strengthen team culture and a positive work atmosphere.

Ocee & Four Design, leveraging strong design resources and exceptional product quality, continuously leads innovation in the furniture industry. The company collaborates with numerous renowned design studios to ensure that each product combines cutting-edge design concepts with practical functionality. Products undergo rigorous quality control and testing, meeting multiple international standards to ensure durability and safety. As a result, many of Ocee & Four Design's products are found worldwide, becoming timeless classics that stand the test of time.

1930

Where it all Began

Karl Birkemose started his coach building business, Birkemose A/S, in the 1930s in a townhouse in Gislev, Funen, Denmark. This unassuming red brick house now houses an international furniture manufacturing company. It's unlikely that Birkemose foresaw his business growing to such heights.

1950

Expanding the Product Portfolio

Birkemose A/S began producing components for the furniture and playground industries. They also manufactured furniture in collaboration with Danish furniture maker Sika Design. Early company memorabilia provides a glimpse into the origins of Birkemose's involvement in these industries.

1990

Four Design is Established

Alongside three partners, Birkemose established Four Design (originally 4-Design) in the 1990s. In 1995, Ervin Keldorff joined as Business Director, and by 1998, the company had expanded into new export markets while still being based in Gislev. To support growth, they expanded the original building with additional warehouses to accommodate larger stock volumes.

2006

At the Stockholm Furniture Fair, the FourCast®one chair and furniture family concepts launched successfully. Designed by STRAND+HVASS, the FourCast®one chair became an instant hit and is used globally, from universities to corporate offices like Lenovo/IBM in Shanghai.

2010

New Partner ships

As markets evolve, Four Design adapts, seizes opportunities, and overcomes challenges. In 2010, Four Design expanded its global reach through manufacturing partnerships in the USA, Australia, and China. These new alliances have enabled Four Design to offer its products worldwide with successful sales.

2014

Four Design launches the FourSure Family

In 2014, Four Design introduced the FourSure chair family to our product range. Designed by award-winning designers Christina Strand & Niels Hvass, the FourSure stacker features a more curvaceous and organic design compared to its predecessor, the FourCast®2. Despite this, it retains the same functional and robust qualities that have made it extremely popular.

2016

A Huge Milestone

In 2016, Ocee Design acquired all shares in Four®Design, forming the Ocee International Group. This alliance provided a strong foundation for future growth both in Denmark and internationally. CEO Alistair Gough highlighted the shared values and complementary strengths of both companies as key drivers for the acquisition's success.

2017

Acquisition of Race Furniture

In 2017, Ocee International acquired Race Furniture, a Gloucestershire-based company that has been a leader in designing and manufacturing seating for public spaces for over 70 years. Ernest Race, a key figure in early 20th-century British design, created iconic pieces like the BA and Antelope chairs, which are still produced in the UK. Despite not being formally trained, Race's innovative designs remain influential and are still manufactured today.

2021

Opening New Doors

At the start of 2021, Four Design moved its premises from Gislev to Odense after careful consideration. The new site in Odense features solar power and high insulation standards to reduce CO2 emissions, making it easier to access for customers and serving as a working showroom. While the Gislev site, with its sentimental value, will be missed, the move was seen as a positive step forward.

2023

A new chapter in our story

It's time to bring the families together in a new chapter titled "Ocee &Four Design." It has rebranded to strengthen market position and redefine identity by blending cool, minimal Scandinavian design with eclectic British maximalism, creating an exciting and unique brand personality.
