

FABIO

Executive

NOVAH®

FABIO puts simplicity above all else in design, leaving behind the unnecessary metaphysical considerations of traditional supervisor's space. Simplistic yet not simple, it demonstrates more of one's attitude towards life, his wisdom as well as his taste.

We always consider how our products can become essential elements and the finishing touch in any space. Therefore, in modern executive spaces, we focus on the harmonious integration of product and environment, the interplay of light and shadow, and the overall ambiance and tone of the space.

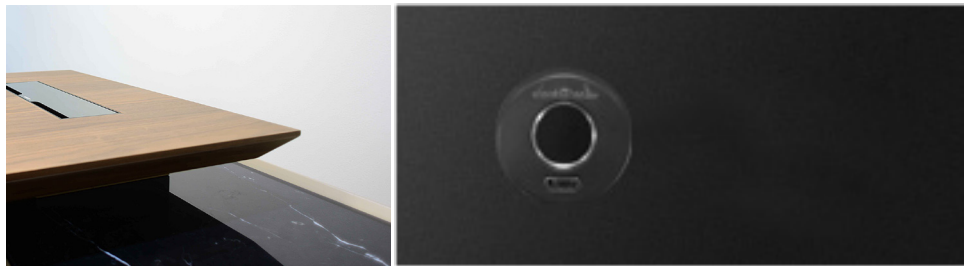

Behind the minimalism are rich and diverse multi-level functions and colors. The combination of stone and wood gives people a sense of harmony, elegance, warmth together with simplicity. In addition, the refined modern equipment and power management system render working flexible and intelligent, enabling you to do everything.

With simple products and the most straightforward words, it displays the ultimate modern supervisor's space. The impeccable integration of layout and functions shows humility, reservation, morality and wisdom.

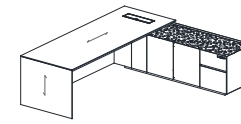

- The concise and modern appearance design and well-arranged and unique main and auxiliary desks are only customized for you.
- A mix of materials: Combination of solid wood and multiple materials; different back cabinets for different requirements of the space.
- Thoughtful in details: A 45-degree concave-down chamfer on the top of the back cabinet and side cabinet makes it safer and more convenient to put items.
- Practicality and comfort: Silent slow-closing slides render silence superior to sound; fingerprint password lock offers you an experience of storage without key.
- Hidden line management: Given the overlapping position of the main and auxiliary desks inconvenient for storage, the main desk is equipped with an EB socket for better power access of mobile office equipment.
