

ADMY BROCHURE

NOVAH[®]EDU
诺梵教育家具

The educationalist Reggio Emilia once said that there are three teachers in a classroom: the student, the teacher and the environment itself. With its simple design, Admy is adaptable and works in any learning environment, encouraging students to focus on their studies.

L-ARM TABLE LEG

L型支臂桌腿

Admy creates adaptable learning Spaces that transition easily from season to season. Unique L-shaped table legs maximize leg clearance for easy entry and exit of students. Anti-collision design details are used to support students' dynamic interaction or individual focused work, avoiding the physical pain caused by accidental impact. In addition, the responsive design includes anti-slip feet to solve the problem of uneven floors and scratches to the PVC floor.

NON-SLIP MATS

FOCUS ON LEARNING

专注学习
