Seating

NOVAH

# AIX

With the arrival of the era of artificial intelligence and 5G, hi-tech enterprises grow vigorously and then AiX (sounds like “X”) emerges as the times require. At the core of this chair is the “X” type core pillar design full of sense of technology, representing unknown but hopeful infinite possibilities. Hive structure back design with a sense of rhythm is inspired by the “hive mind” put forward by Kevin Kelly in his book *Out of Control*, which compares employees to bees as they create greater value for organizations and enterprises by the wisdom of the crowds brought through collabo-

# Approach V A NEW

The researchers, led by Dr. Wasim Amir Bashir, found that when sitting with legs straight and thighs parallel to the floor, the pressure on the lower back increased significantly.

In fact, it's better to lean back a little while sitting. Optimal sitting posture means the angle between your torso and thighs is 135 degrees, which means that this sitting posture causes the least "pressure" on the lower back compared to the upright sitting posture where torso and thighs are at a 90-degree angle.

The conclusion is that 135° sitting posture is best for your back.

# WORK from V Angle

that when a person sits up straight, keeping his back  
imposed on the lumbar region of intervertebral disc  
ases.

g on a chair, though that makes you look slouchy.  
ur torso and thigh is kept at 135°. Studies have shown  
n the lumbar vertebra, especially when compared to  
and thigh are approximately vertical.

for the back and people should sit at this posture.

# Leaning Back Properly Leads to Deep Relaxation.

Retractable footrest can be pulled out. Turning the footrest surface outward to adjust its length when you feel comfortable; while turning the footrest surface inward, push it inward until it reaches to the bottom.

**Four-stage tilting locking mechanism**

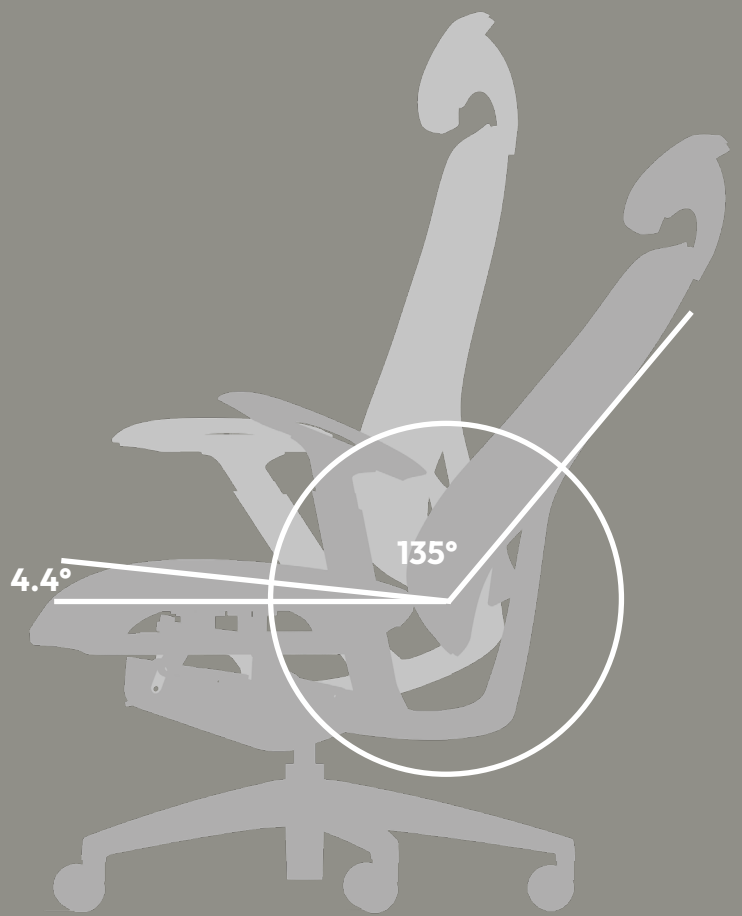

---

**31° tilt angle difference**

---

**The maximum tilt angle can be up to 135°.**

---

Enable users to relax their body and muscles to the greatest extent, giving users an excellent sense of use.

# A Good Headrest Should Care the Neck

AiX's pillow-type neck rest breaks through the traditional method of headrest.

It can provide support for users' necks anytime and anywhere and care for neck health.

# Freeing Legs, The Most Comfortable Rest

It is equipped with footrest, allowing users to relax their feet, so they can have a good rest easily and comfortably in the office.

AiX offers comprehensive care for users' neck and legs.

# Suspension Seat for Sedentary Persons

AiX adopts suspension-type seat cushion with hollow frame. Its supporting plane is made by elastic fabric and high-elasticity sponge, which has the dual advantages of comfortability and breathability similar to sofa for sedentary office workers.

# Unique Color Collocation To Create Rich Color Options

International testing standard of office furniture of Business and Institutional Furniture Manufacturers Association (BIFMA)

AiX chairs are manufactured strictly in accordance with BIFMA international testing standard for office furniture, and each part has passed through the test. Our quality is guaranteed with craftsmanship.
