and fun

Ultimate flexibility options to unlock

Today's modern environment is a new culture. However, in order to adapt to this new culture, it is necessary to change the way we work.

New working styles are emerging, such as workgroups, but adapting to these new styles is difficult.

ACOUSTIC BRICKS
your working environment

ibility, great acoustic credentials and colour
eash your creativity.

vironments are predominantly open areas offering a more transparent
ncreased noise levels and visual distractions lead to resued productivity.

require greater flexibility , We want to expand and contract our
accommodating these changes in fixed rooms and meeting spaces can be

offer flexibility. great acoustic credentials and aethetic options to enhance
onment.

FABRICKS & DIAMOND

What is ACOUSTIC BRICKS?

Fabricks & Diamond are two kinds of indoor bricks made from acoustic foam and wool fabric, designed to look fabulous, divide space and reduce noise.

FABRICKS & DIAMOND

Outstanding Acoustic results

**Acoustic products usually fit
into one of three categories—
Absorbing, Blocking or
Covering solutions.**

- **Absorbing** sound involves converting sound energy to heat to prevent unwanted reflections
- **Blocking** redirects the sound, prevents it travelling to sensitive listeners
- **Covering** introduces a pleasant sound into the environment so that others might be ignored

What does the research say?

- 70% of workers believe that noise is the most significant distraction
- 80% of workers believe that a quieter environment would enable them to be more productive
- The majority of workers identify conversation as the type of noise that most affects their performance
- The accuracy of tasks involving memory & arithmetic decreased by 67% when subjects were exposed to noise.

The background of the top half of the slide is a close-up photograph of dark blue, textured acoustic panels. A semi-transparent dark grey rectangle is overlaid on the right side of this image, containing the first section's text.

Why do we care about acoustics in work environments?

- It influences productivity
- It influences wellbeing
- It influences worker satisfaction

Why install acoustic solutions?

- 300% increase in perceived worker satisfaction
- 20% increase in measured sales productivity over 6 months
- 48% increase in task focus
- 51% decrease in conversational distractions
- 10% improvement in tasks relating to accuracy and memory
- 27% reduction in physical symptoms of stress
