

# Zuna

Task Chair

NOVAH

# Depth Adjusted, Not Compromised.

A chair with a fixed seat depth forces the body to adapt—often at the expense of comfort and support. Thighs hang unsupported, backs lose contact, and pressure builds at the knees. This common mismatch doesn't just cause discomfort; it undermines postural integrity and increases strain on the lower back.

At Zuna, we engineer from a different principle: support must conform to the individual. That's why adaptive seat depth is central to every chair we make. A simple, intuitive adjustment allows the seat to meet you precisely—fully supporting your thighs, freeing the backs of your knees, and ensuring consistent lumbar contact. It's the foundation for sustained comfort and focused work.

## Two Lumbar Options, One Perfect Match for You

Zuna offers optional lumbar supports in two versions: polymer or upholstered. The polymer version is sleek, durable, and easy to clean, making it ideal for high-frequency use. Contoured to fit the lumbar spine, it delivers firm, consistent support. The upholstered version features a generously curved surface with a high-density, slow-rebound core. It wraps around the lower back with a supportive embrace, precisely following the spine's natural contour. Select the version that matches your preference for sustained comfort and support throughout the workday.

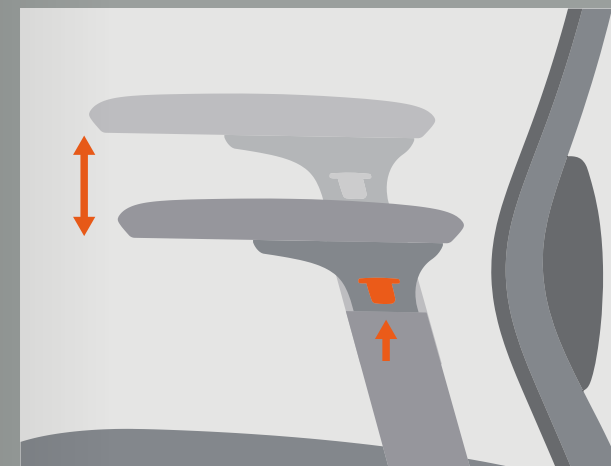

## All-Scenario Adaptability System: Designed for Every Way You Sit

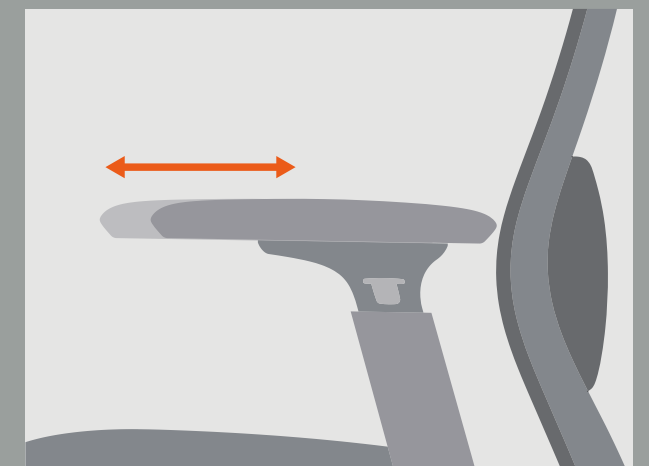

\*Four-position synchronized tilt mechanism

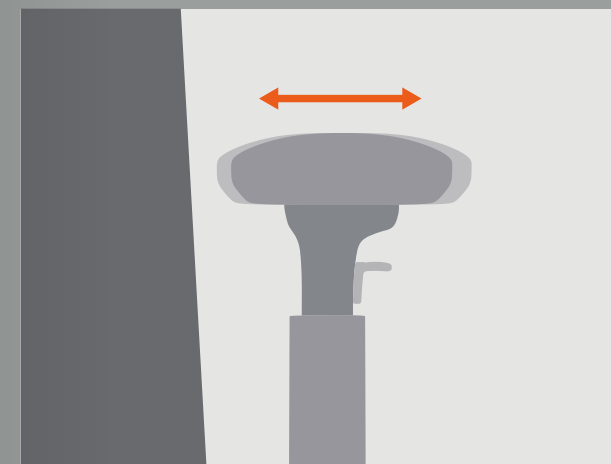

Zuna unlocks a truly adaptable experience. From seat depth adjustment and configurable 2D to 4D armrests to an optional reclining rest system, every element is designed for choice. Multiple base options allow you to seamlessly shift between focused work, relaxed breaks, and collaborative discussions—tailoring support to your body and task in any scenario, where comfort consistently meets practicality.

Molo: Table Board, M21 + Support Bracket, P4 + Leg, Electroplated

In every meeting—whether brainstorming ideas or finalizing plans—Zuna moves with your every posture. Stay relaxed even through long sessions, and keep your focus sharp all the way through.

## Zuna × Gabriel: Sustainable Fabrics for Comfort with a Conscience

Zuna features fabrics from Gabriel, a textile manufacturer deeply committed to carbon neutrality, bringing comfort empowered by green materials! Adhering strictly to the globally widely used GHG Protocol accounting standards, the fabrics are produced with 100% renewable energy such as wind and solar power. Furthermore, carbon emissions are neutralized by supporting Gold Standard carbon offset projects like India's Beluguppa Wind Farm. Every inch of the material embodies unwavering environmental responsibility—soft, skin-friendly, and durable enough for high-frequency use. It not only delivers ergonomic comfort but also turns your choice into a force for climate action. Enjoy premium quality and embrace a sustainable lifestyle ecosystem together!
