K12 Desks & Chairs

**DESIGNING FOR
KIDS TO
RESPECT
THEIR NATURE**

Be with you.

“Early sprouting of children’s ability is especially valuable. The direction we guide their natural tendency can frame children’s basic habits and determine children’s later ability.”

John Dewey
American philosopher and educator

SEVENTEEN is a family of learning chairs developed on the long-term research of learning behavior of teenagers aged 5 to 17. We believe that teenagers' learning concentration is different from adults. Only when the chair is comfortable enough to allow their activeness, can they have longer focus while learning. Today's classroom is no longer just a space for receiving information and guidance, but a place that integrates learning, entertainment, discovery and exploration. This means that our new products need to have the ability to transform classrooms into multiple uses, and need to evolve towards dynamics and completeness.

Therefore, SEVENTEEN series supports more sitting postures comparing with other chair products for teenagers, so as to help them obtain longer lasting learning focus.

Teenagers' chair, teenages' desgin.

Teenagers sit shorter than adults.

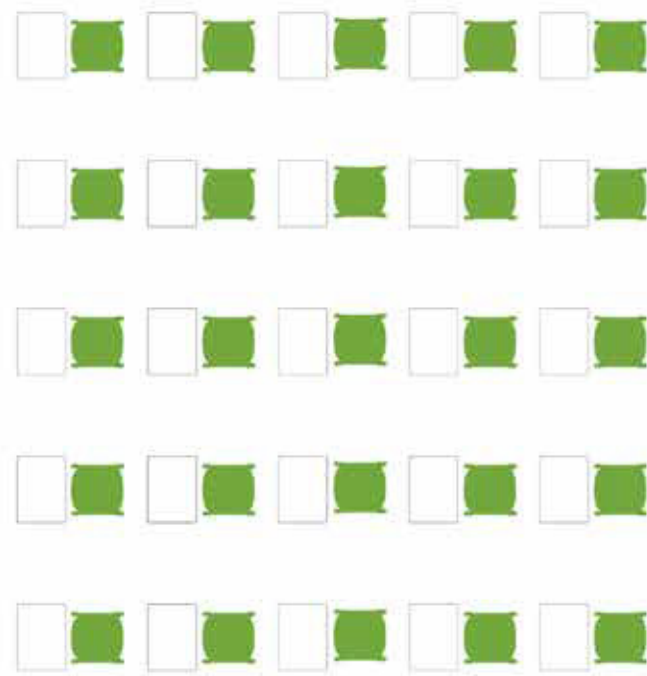

Teenagers are easier to be distracted than adults.

Teenagers are more interested in playful design.

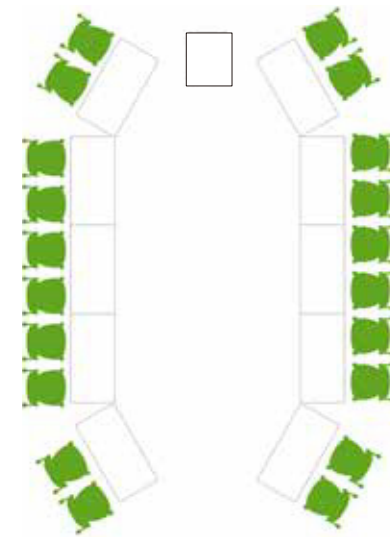

Children aged 5 to 17 are lively and active by nature, that's why it is difficult for them to sit in a fixed posture for a long time, as compared with adults. Overemphasizing the correct sitting posture will reduce their concentration on learning. **SEVENTEEN** is tailored for children behavior to sit there and have fun.

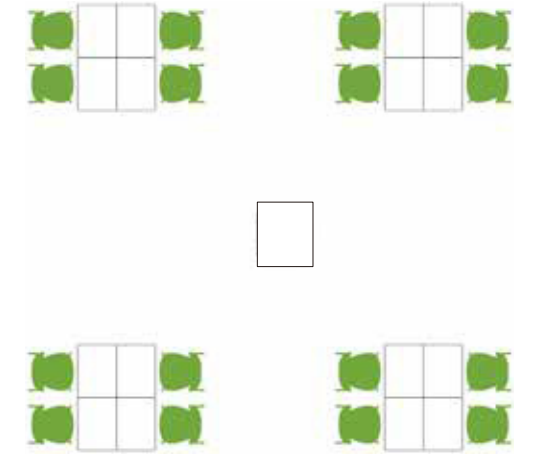

Besides keeping students listen carefully in the conventional classroom, the design of the **SEVENTEEN** can help students share knowledge more easily and naturally in the social learning spaces and multi-functional classroom.

Activate discussion and explore collaboration

Research shows that when the distance between group members is within 1600mm, the discussion will be activated.

The traditional rectangular table and inappropriate combination form bring them the center position.

01 Basic shape

02 Combination mode

Different combinations bring different learning environments, from individual homework, to group activities, then to collaborative exercises, making learning interesting and efficient.

Learning partner

SEVENTEEN CANTILEVER CHAIR is especially suitable for conventional classroom. When seated to study, it will lean forward and open the angle of the hip to help keep the spine in the right position. When students lean back to relax or listen to the lecture, the shell will bend slightly to help ease the tension and enhance attention.

A flexible seat back provides the right tilt angle

Cushion to protect the desktop

Cushion to protect the floor and hold steady

Easily nest to a desk

More relax, more focus.

The unique scalloped backrest encourages teenagers to communicate and learn in a more relaxed posture.

Cuter, more childishness.

Bee waist design supports relaxed sitting as of riding horse.
The chair is also a toy after class.

**Waterdrop style edge design,
more comfortable in sitting.**

Waterdrop style waterfall edge design can reduce energy loss due to discomfort so that children can stay focused longer.

ONE DESIGN FITS EVERYONE

SH350 in Grade 1 to 3 is suitable for student with height of 1350-1570mm.

SH380 in Grade 4 to 6 is suitable for student with height of 1500-1640mm.

SH430 in Grade 7 to 12 is suitable for student with height of 1650-1870mm.

3 Chair sizes to match

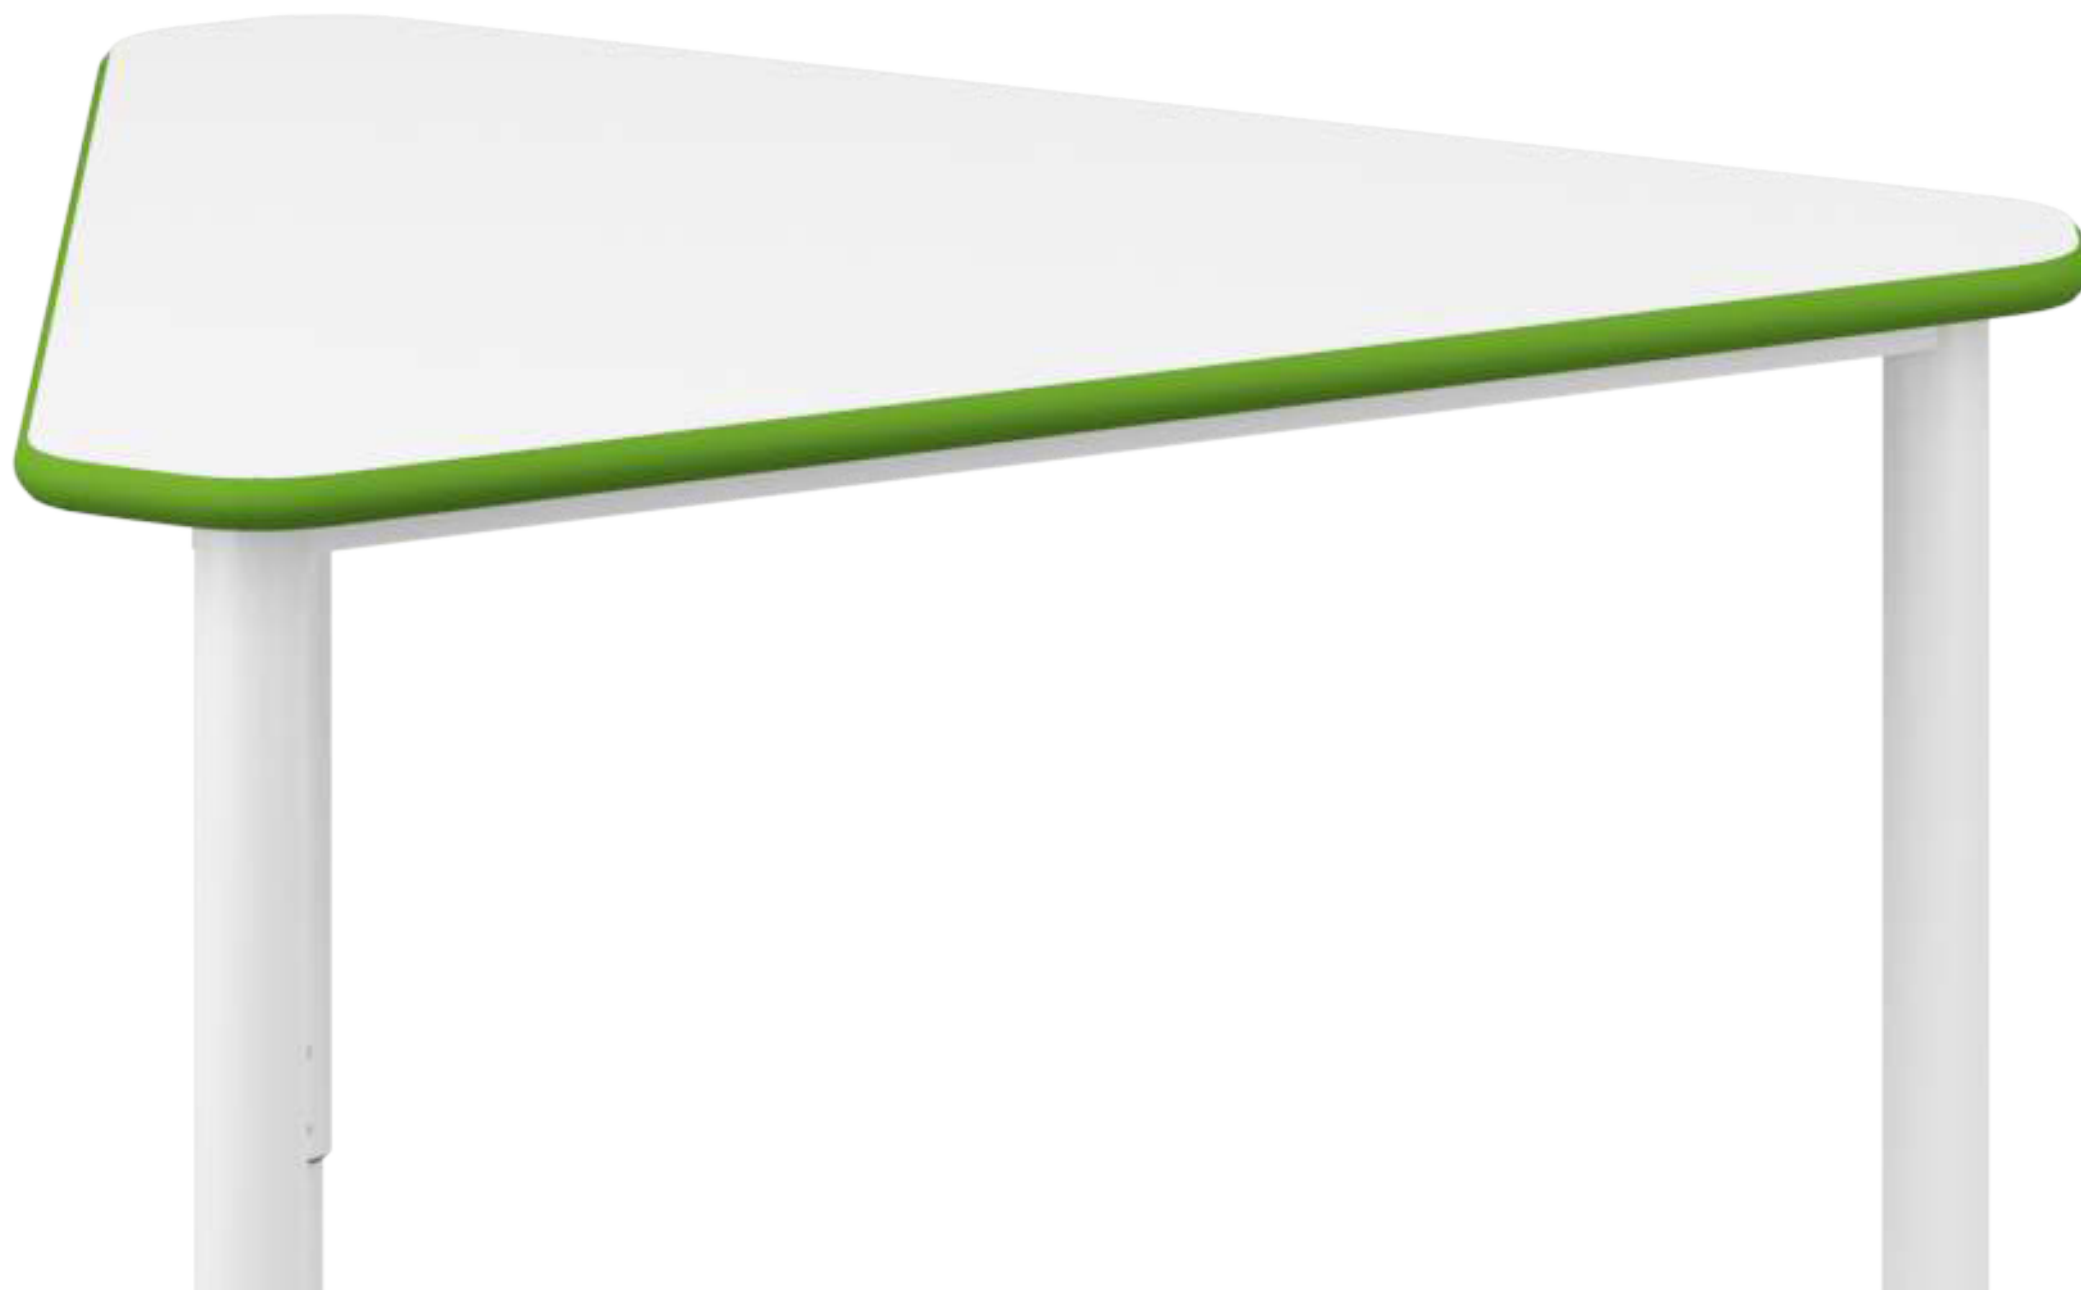

SEVENTEEN 4-LEGED CHAIR

SEVENTEEN™ CANTILEVER CHAIR

SEVENTEEN adopts a lot of ergonomic data and comes up with 3 sizes for teenagers from 5 to 17 years old. They are not merely zoomed products in size, but rather targeted design catering for children of different age groups.

ONE DESIGN FITS EVERYWHERE

With the improvement of processing technology, we have achieved three main selling points:

Reducing the pressure on inventory, transportation and installation, and enhancing the ability to quickly deliver large orders.

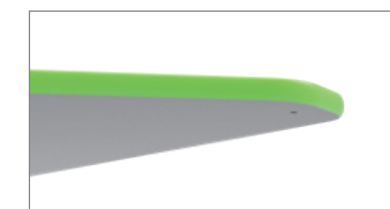

Threading table leg:

- Accurate positioning
- Quick assembly
- Without screws exposed

Circular table stand:

- Disperse the impact
- Concise appearance
- No exposed screws

Colorful impact-resistance edge sealing:

- Buffer collision
- Anti-tensile
- Multiple choices of colors

Stable and comfortable

SEVENTEEN 4-LEG CHAIR is widely applicable. Stable and comfortable ever in narrow space. It is suitable for shared spaces, for example canteen, auditorium, multi-functional classroom and regular classrooms.

Colorful chair, colorful childhood

COLOR PSYCHOLOGY is based on by SEVENTEEN to offer more joys for children. Different colors can lift up children's learning and memory ability.

- **Blue** Blue enhances creativity and stimulates a cool and relaxing environment.
- **Yellow** This is indeed the color of happiness and sunshine for children. Yellow stimulates intelligence and is ideal for use in kids' rooms, study rooms and play areas.
- **Green** This is the color of nature; it can relax and contribute to better health in kids.
- **Orange** Many educational institutes use this color as it enhances critical thinking and memory. Test rooms in this color are known to enhance performance in exams.
