FUTURE MAKER MAKE FOR FUTURE

Hover

Ages 6 to 12 are when children are most prone to developing a hunchback. During this period, schools and parents should focus on helping children form good sitting and standing postures. Long-term slouching increases the risk of spinal deformation, so early correction is essential for children showing signs of hunchback. Once students enter high school, such bad habits become much harder to correct.

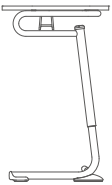

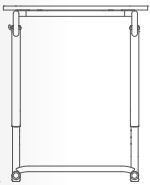

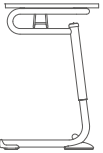

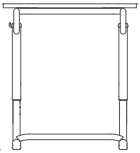

The Hover bow-leg height-adjustable desk features an iconic floating design that combines modern aesthetics with reliable structural stability. Offered in two sizes, it fully accommodates students from elementary through high school. The desk is equipped with a large-capacity under-desk plastic book box as standard for neat and orderly storage. Silicone non-slip floor pads are fitted to the desk legs to effectively prevent floor scratches when the desk is moved, ensuring safer daily use.

The Hover student chair is designed to provide excellent spinal support for students. Beyond fulfilling basic functions, it helps students maintain a healthy sitting posture, fully reflecting care for their physical and mental well-being. The bow-leg chair is equipped with a desktop protector pad, allowing the chair to be stored on the desk surface for easy floor cleaning without damaging the desktop.

The Hover four-leg height-adjustable desk inherits the classic lifting function of the Hover series. Equipped with adjustable floor glides, it effectively compensates for uneven ground and ensures stable placement. Available in two sizes to accommodate students of different heights, it delivers comfortable support for long-hour study across all grade levels.
